

Dear Colleagues,

On behalf of the Organizing Committee of the

INTERNATIONAL SCIENTIFIC CONFERENCE

„*Vaccinium* ssp. and less known small fruits: perspectives of development and health benefits”

I have a very unpleasant duty to inform you that our event is cancelled for the year 2011. This situation is caused by very few declarations of participation as well as extremely limited number of oral presentations, (just seven). In our opinion the global slowdown of the economy makes big difficulties for many potential participants to provide sufficient funds for such conferences. However, we do hope to organize this conference in the near future. Due to the 2012 UEFA European Football Championship which will be held in Poland next year we intend to organize Vaccinum Conference in the year 2013.

We are deeply sorry for any trouble and inconvenience which are caused by our decisions. Thank you very much for your kind understanding.

With best regards,

Secretary of the Organizing Committee

Dr Krzysztof Zmarlicki
